

# DeNova 2000

The year 2000 has finally come! It seems so unreal. Some will be saying good-bye to this school, a place that has become a home for four years; while others are just starting out on this journey that some call life. As this book begins, open your heart and take in what it has to offer. Whether a senior, junior, sophomore, or freshman these memories will touch your heart and mind. As life after Fairfield Central begins remember the lessons that this school has taught.

"Rising above the limits" is the theme, but do you really know what that means? It states that no matter the person, one can rise above all expectations that society has set for them, whatever the case may be. Take the lessons that have been taught at Fairfield Central High School, as well as those from friends, teachers, and family, and run with them. Don't ever let them leave your mind.

LaFrances Grier

*Kendra Bouknight, Kolisa Willingham, and Tabbitha Caldwell go beyond what is expected of them as they open up their minds. They are Rising Above The Limits as others who will walk through these Griffin doors.*
