JACKSON, DARTANYAN

JACKSON, DETRICK

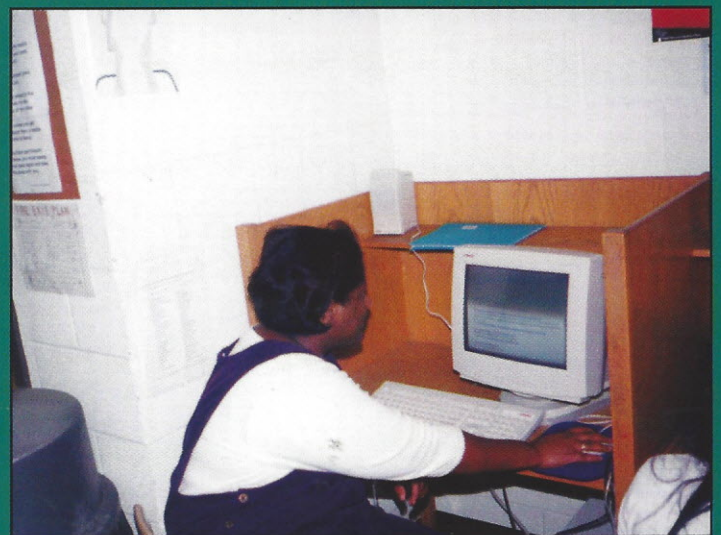

JACKSON, LATOYA:

Internet Buddies

A common question heard by computer teachers and media specialists is: "When are we getting on the Internet?" The Internet is becoming an important pastime for many students. Students rush to log onto the World Wide Web to check their email accounts, meet new friends and mates, complete homework assignments and other various activities.

Whether through emails or instant messages, students can communicate with others from around the world. Teachers are also beginning to incorporate the Internet more into their curriculum, giving the students a truly "worldly" experience.

G. Lemon, W. Ulch, M. Leach

Ms. Brown "surfs" the Internet during her class' trip to the Media Center. Like in Ms. Brown's class, all students are encouraged to obtain information from the Internet, the "Information Super Highway".
