

# English

The English department here at Fairfield Central High School is dedicated to teach each student about the world. English can help you advance in college and communication. It enhances listening skills and the ability to speak well.

The goal of the English Department is to implement the program through a variety of resources. The second goal is to creatively communicate and to culturally participate in their environment.

As students go through their four years of English, we hope that they will be able to communicate better. English will also help you become a better person in the future.
