

Mathematics

Do you find mathematics to be important? Many students do not feel that math is an important subject, however math provides students with basic skills they will use for the rest of their lives. The Math Department at Fairfield Central High School provides students with the mathematical knowledge necessary to enter college and technical schools or to survive in the adult world.

Classes such as Algebra I, Algebra II, Algebra III, Calculus, Statistics and Probability and Graphic Calculators are some the classes that will provide students with the mathematical background they will need later in life. Math for Technology courses are taught for those going to technical schools.

Teachers in the Math Department work hard to provide students with the necessary skills and knowledge they will need in their adult lives. Some of the teachers stay after school regularly to ensure that all students can succeed in math!
