

# Junior Achievement

Junior Achievement is an interesting mix of club and class. The purpose of Junior Achievement is to teach students about the demand side of economics. The students start a company and run it throughout a semester. Students apply for certain positions from President/CEO to production worker. The company then chooses which products to make and sell. Stock in the company is also sold. The stock sold is held until the company is liquidated. After this occurs, dividends are paid to stock holders and employees. Keisha Willingham comments "Junior Achievement helps me in the real world. Since I plan to run my own business in this community, I can apply the concepts learned in JA to my business." Mr. William Martin is the club advisor.
