

Distributive Education Clubs of America

Distributive Education Club of America is an exciting club at the Fairfield Career Center, dealing with Marketing and Business Education.

The Career Center students enjoyed learning about marketing education from many different teachers throughout the year, including club advisor, Mrs. Sondra Pearson. In DECA, students learn about business, interviewing for jobs, communication skills, as well as management skills. Students compete with other groups throughout the state and country. Above all, the club promotes unity. Mrs. Pearson stresses through everything that in business, a group must work as one to achieve goals.

DECA students prepare for a future in which they will be the leaders in the business world. With the skills and lessons learned, DECA students will be prepared to accomplish all of their goals in the business world.
