

We're Building Our Pride

The tornado of March 28, 1984, necessitated a massive building program at Richard Winn Academy. The efforts of many people made possible a fine new facility that reflects the excellence to which RWA has been dedicated for the nineteen years of its existence.

This excellence is seen in the numerous accomplishments of our students. For instance, an extremely high percentage of our graduates seek a higher education, and many receive college scholarships and advance place-

ment. Our students consistently gain recognition in academic and music competition, as well as in athletic contests. This year Richard Winn has a National Merit Scholar.

These accomplishments certainly reflect the dedication to excellence of everyone involved with this school. Actually, the new buildings will symbolize the pride we have in the quality of our total program. Yes, we're building at Richard Winn: We're Building Our Pride.
