

Dressed in their lab costumes, Allan Turner and Doug Raley are working intently on their chemistry experiments.

Junior Year Is Busy One

We Juniors had our hands full this year with academics and numerous extra-curricular activities. In addition to trying to raise enough money to sponsor a super prom, we were active participants in sports, clubs, and Student Council projects.

If that wasn't enough, the teachers kept pouring work on us as if there would be no tomorrow. Mr. John McSwain's high expectations of his chemistry and Algebra III students put pressure on us and made us old before our time. Writing the term paper for U.S. History was no breeze either. Mrs. Murray couldn't understand why we didn't have time to read five long novels along with all of our other work. Mr. Stogner never let up on the homework or the pop tests. Mrs. Billingsly required all of those journal reports month after month after month.

It was pretty evident to us that these teachers sometimes got their priorities mixed up!
