# COMPUTER SCIENCE

The 8th grade class has been taking computer BASIC programming second semester. Their eagerness to learn about the TANDY 10005 HX capacity has proved very rewarding to the success they have. They learned the four kinds of keyboard keys; the care and use of the floppy disk; and programming in BASIC with IF/THEN conditions, FOR/NEXT and GOSUB routines. Learning about computers is certainly going to help these students in this quickly changing world.   by Mary Paul Bonds

Jarrett Douglas says he's got this computer thing under control, but Robby Davis isn't quite sure if he should beleive him or not.

Jennifer Weed seems a little hesitant to have her picture taken.

"I see you with that camera!", says Jennifer Brice, while Dawn Cunningham tries to turn away but she's not quite fast enough.
