

SCIENCE IS FUN! Tess Miller studies hard during science class in Mrs. Brown's room. Even during part week Tess kept her mind on her studies, and so found time to enjoy the week's activities.

LET'S GET CREATIVE. Third grader Ashley Bedwell busies herself copying her science terms for the week. Third grade science is full of many exciting topics from which each student learned a great deal.

BONE UP! Mark Talbert from the Clemson Extension Office comes to tell the children all about his adventures in Africa. He showed them artifacts of all kinds, and the students immensely enjoyed Mr. Talbert's visit.
