#### LOWER POWER

Brittni, Jeni-Bruce, Meredyth, and Robert Mason entertain the audience in their own unique way. Mrs. Allen's biology class had fun learning about chlorophyll and presenting their projects.

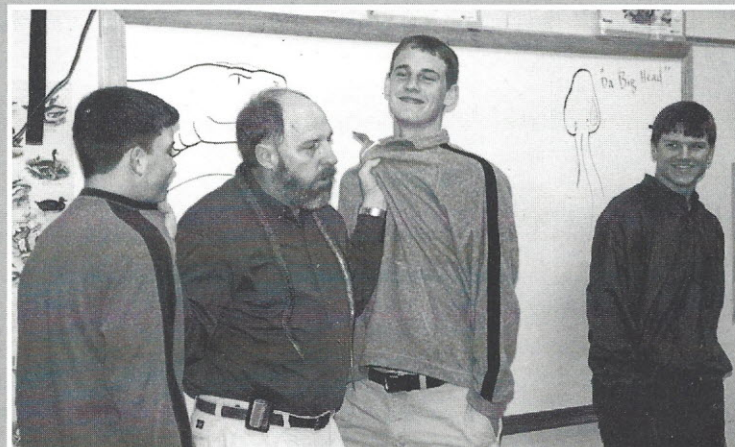

#### CHLOROPHYLL

Kyle Byrd, Will Hutchins, Will Lemmon, and Casey Brazell perform their science song. They based their lyrics on the song "Glycerine" by Bush.

#### RAPPING IT UP!

Robert Mason, Sam Arnette, Josh Peake, and Josh Allen perform their original rap rendition about photosynthesis. Needless to say, this quartet and their "music" was a big hit.

#### SSSSSSS...TERICAL

Smith Harden and Kyle Byrd smile as they proudly volunteered to be used as examples when the DNR man came to teach Mrs. Allen's classes about reptiles. It was quite an unforgettable learning experience.
