

What's another way we bring you power?

By making educational outreach a top priority.

As your Touchstone Energy cooperative, Fairfield Electric has made community commitment one of our top priorities. By sponsoring high school students to attend informative Washington Youth Tour and through other educational investments, Fairfield Electric wants to help students reach their educational goals.

We firmly believe that our educational efforts can have a far-reaching effect not only for the individuals we help but for the community at-large. And when it comes to community commitment, we believe educational outreach is one of the most important things we can ever offer.
