School crim

By TERRANCE THOMAS

Staff Writer

Crime reported in Fairfield County schools dropped drastically for the months of January, February and March.

According to Fairfield County School quarterly reports, crimes committed in the schools' building and yards have gone from an average of 72.5 reported during the first two quarters to only 19 in the third quarter.

Even Fairfield Middle School and Fairfield Central High School, where most reports of criminal activity come from, experienced fewer incidents of crime.

Both schools had an average of 64 crimes each quarter. For the third quarter, only 13 total were reported at both schools.

The quarterly crime reports comprise only reported criminal activity.
