

2/27/95

Ms. Haslett told us that the Matton's used to sit in the dining room all the time. They use to feed the birds from the south porch. When she came to visit she always used the side door because she knew that is where they would be. She also told us that there use to be a door between the living room & dining room. The Crafts are the ones who put in the wrought iron & removed the door.
