

In regards to Dr. Henry Woodward: There are no patrilineal descendants of Dr. Woodward. Many years ago I was researching the Woodward line as I wanted to prove descent from Dr. Woodward in order to join the Dr. Henry Woodward Chapter of the Daughters of the American Colonists (DAC). As part of my research I consulted with Clara May Jacobs at the Caroliniana Library of the University of SC. She was very familiar with the history of Dr. Woodward as she, herself, was a member of the Dr. Henry Woodward Chapter of the DAC. She assured me that her research and other accepted documentation proved that Dr. Henry Woodward left no known male descendants.

I am a direct descendant of Thomas Woodward, the Regulator through Thomas Lyles' marriage to Mary Ann Collins Woodward.

Susan Lyles McLane
